See permit conditions below

Follow the instructions in the Plant Inspection Station Manual for Low Risk Organisms - Arthropods or Microbials Red and White Labeled Packages (may be opened outside a biosafety cabinet; see procedures for handling on page 3-7-42). For questions or concerns, contact USDA APHIS PPQ in Riverdale, MD, at 301-851-2046, toll free 866-524-5421.

PERMIT GUIDANCE

- 1) This permit does not authorize movement or release into the environment of genetically engineered organisms produced with the regulated organisms described in this permit. Importation, interstate movement, and environmental release of genetically engineered plant pests require a different permit issued under regulations at 7 CFR part 340. Any unauthorized interstate movement or environmental release, including accidental release, of a regulated GE organism would be a violation of those regulations. Additional guidance and contact information for APHIS Biotechnology Regulatory Services, can be found at: <https://www.aphis.usda.gov/aphis/ourfocus/biotechnology>.
- 2) If an animal pathogen is identified in your shipment, to ensure appropriate safeguarding, please refer to http://www.aphis.usda.gov/import_export/animals/animal_import/animal_imports_an_products.shtml
- 3) If a human pathogen is identified, please refer to the CDC Etiologic Agent Import Permit Program at <http://www.cdc.gov/od/eaipp/>
- 4) This permit does not fulfill the requirements of other federal or state regulatory authorities. Please contact the appropriate agencies, such as the U.S. Environmental Protection Agency, the U.S. Fish and Wildlife Service, the U.S. Food and Drug Administration, the Centers for Disease Control and Prevention, the APHIS Veterinary Services unit, the APHIS Biotechnology Regulatory Services, or your State's Department of Agriculture to ensure proper permitting.
- 5) If you are considering renewal of this permit, an application should be submitted at least 90 days prior to the expiration date of this permit to ensure continued coverage. Permits requiring containment facilities may take a longer period of time to process.

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

4. All persons working with these organisms must be informed of these permit conditions. Anyone working with these organisms must agree to and sign/ initial these conditions before beginning work. These signed conditions do not need to be submitted to USDA APHIS but must be readily accessible in the event of an inspection and presented upon request.

Note: these conditions may be copied and stored electronically for electronic signature and initialing provided that the permit number, authorized organisms and life stages, release locations if applicable, and authorization statement all appear on the document with the permit number. Signing these conditions only indicates that the person working under this permit has read them; the permit holder and their designated agent are the responsible parties under this permit.

5. The permit holder and/or those authorized by the permit holder shall conduct or supervise all field related activities connected with the use of the regulated organism(s), such as application, sampling and plant care. Plots must be located in limited access areas (i.e., not general traffic or public areas) and must be clearly marked during the duration of the experiments.

The Permit holder must maintain updated protocols for planned and on-going field trials, including maps or other depiction of plot locations and make them available to USDA APHIS upon request.

The total area of plots receiving inoculation must not exceed 10 acres in one year per culture/isolate. Multiple inoculation events on the same areas within the same year are not additive to the 10 acre limit, but additional field trials in other locations under other permits are additive.

6. All organisms must be shipped in packages of such materials and/or construction so as to prevent the unauthorized dissemination or release of regulated articles
7. Upon receipt of organisms regulated under this permit at the field research destination, all packages with the live organisms regulated under this permit including preparations (e.g., incubating cultures in various media for increase and growth/ treated soil, treated seeds) must be kept in laboratory, storage or similar areas with access restricted to authorized personnel.

Likewise, media mixing, seed treatment, soil incorporation and other application activities at the field site must be performed by authorized personnel.

8. Regulated articles must be shipped, or transported to the field, in securely sealed and escape-proof packages.
9. The permit holder and those s/he designates are authorized to transport regulated organisms in containers as described in Condition #8 in California by motor vehicle or commercial transportation.

10. All un-used and leftover organisms, and all packaging materials in contact with organisms and/or contaminants, must be sufficiently heat or chemically treated to kill all regulated organisms and contaminants prior to disposal.

Alternatively, un-used inoculum and packaging materials may be deep buried (at least two feet deep) on-site at the release site, or double bagged and disposed of in a municipal landfill.

14.
